Getting Started

Download TPSERVICE and firmware

Click the link below and press "Download" button

https://www.dropbox.com/s/k61gi2vhnsaheci/TPSERVICE%20with%20SW102%26DS103%20Firmwa re.zip?dl=0.

The folder will then be downloaded in a zipped file, called "TPSERVICE with SW102&DS103 Firmware".

Extract the downloaded zip file, TPSERVICE with zip files of SW102 & DS103 firmware.

Afterwards, extract the zip file, "TPSESRVICE.zip", inside the folder "TPSERVICE with SW102&DS103 Firmware".

Launch file, "TPSERVICE" application file, and follow the setup instructions.

Create a shortcut in the desktop, which links to the software, "TPSERVICE", to make things easier.

Uploading firmware

STEP 1: CONNECT THE PROGRAMMING CABLE

Connect the programming cable to the battery, then plug the USB to the PC's USB port.

Plug the USB to the PC's USB port. The opposite end of the programming cable is connected to the main connector of the wiring harness.

Connect the SW102 display to the display connector of the wiring harness and turn on the display.

STEP 2: CHOOSE THE DISPLAY VERSION

💮 TP SERVICE Ver:1.0.1.9 build:20230523	100849			= 8
Product: UARTOCAN	• Co	nnect Read_Info	Data_Clean	
Product Name: Serial Numb	er:			
Firmware Ver: Hardware V	er:	BatVol:		
Update Set				 show Produce
Update File:				
Update				
Info:				

Install TPSERVICE software and double click the icon of TPSERVICE to enter the main window.

Product: SW102	2 💌	•UARTOCAN COM3 -	Connect
Product Name:	SW102	Serial Number:	
Firmware Ver:		Hardware Ver:	BatVol: -
Update Set			

Select "SW102" for "Product" and select the COM port which appears after turning on the display and connecting the programming cable to the computer (in this case, "COM3"), under the drop-down menu.

If it struggle to connect, test different COM ports.

STEP 3: CHOOSE THE UPDATE FIRMWARE

U	pdate Set]
	Update File:	
	Update	

Press the button, "Update File:".

TPSERVICE	2023/3/21 下午 03:09	檔案資料夾
DS103A_Cyc_KM5S_V2.1.16.2_2022	2023/3/17 上午 03:20	BIN 檔案
SW102-CYC-KM5S-V1.1.1-221209(1)	2023/3/17 上午 03:20	壓縮的 (zipped)
TPSERVICE	2022/3/16 下午 12:12	壓縮的 (zipped)

CYCMO

Select the file named "SW102-CYC-KM5S-V1.1.1-221209(1)".

STEP 4: CONNECT THE DISPLAY

	Update Set	
Connect	Update File:	SW102-CYC-KM5S-V1.1.1-221209(1).zip
BatVol:	Update	

Click the "Connect" button in the main page.

(Please note that the label of this button will be changed from "Connect" to "Disconnect" immediately if the connection is success.)

Then click the "Update" button.

Plug the SW102 display to the display connector of the wiring harness.

Info:76%	

Press and hold the power button & menu button at the same time for 1 second, the firmware update process will start.

STEP 5: DISCONNECT THE DISPLAY

Click "Disconnect" button and unplug the SW102 display after the update is completed.

Kindly contact <u>technical_support@cycmotor.com</u> if further assistance is needed.
